How to Order

CHKD B 32 □ - 30 □ - □

With Auto Switch CHDKD B 32 □ - 30 □ - M9BW □ - □

With auto switch
(built-in magnet)

Mounting bracket type

Symbol	Type	Port position (Note)
B	Basic type	—
L	Foot type	Top
		Foot bracket
LB	Foot type	Right
LD		Left

Note) Indicates the relative position of the foot bracket and port, as seen from the rod side.

Bore size

20	20 mm
25	25 mm
32	32 mm
40	40 mm
50	50 mm
63	63 mm
80	80 mm
100	100 mm

Port thread type

Nil	Rc
TN	NPT

Cylinder stroke (mm)

Refer to the standard stroke table on page 265.

Auto switch type

Nil	Without auto switch
-----	---------------------

* Select applicable auto switch models from the table below.

Rod end thread type

Nil	Female thread
M	Male thread

* Rod end thread type is an optional product. (Refer to page 266).

Made to Order specifications

For details, refer to page 265.

Number of auto switches

Nil	2 pcs.
S	1 pc.
n	"n" pcs.

Built-in Magnet Cylinder Model

If a built-in magnet cylinder without auto switch is required, there is no need to enter the symbol for the auto switch. (Example) CHDKDB50-100

Applicable Auto Switches

Refer to pages 431 to 490 for further details on each auto switch.

Type	Special function	Electrical entry	Indicator light	Wiring (output)	Load voltage		Auto switch model		Lead wire length (m)				Pre-wired connector	Applicable load

								3-wire (NPN)	—	5 V	A96V ^{**}	A96 ^{**}	●		—	●
Read auto switch	—	Grommet	No	2-wire	24 V	100 V	A93V ^{**2}	A93 ^{**}	●	●	●	—	—	Relay PLC		
				12 V	100 V or less	A90V ^{**}	A90 ^{**}	●	—	●	—	IC circuit	—			

*1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. A water resistant type cylinder is recommended for use in an environment which requires water resistance. Consult with SMC regarding water resistant type for foot type.

*2 1 m type lead wire is only applicable to D-A93.

* Lead wire length symbols: 0.5 m Nil (Example) M9NV
1 m M (Example) M9NVW
3 m L (Example) M9NVWL
5 m Z (Example) M9NVWZ

* For ø32 to ø100, there are applicable auto switches other than listed. Refer to page 273 for details.

* For details about auto switches with pre-wired connector, refer to pages 474 and 475.

* Cylinders with auto switch will be shipped together with the auto switch and auto switch mounting bracket (ø32 to ø50) (not assembled).

Specifications

Bore size (mm)	20	25	32	40	50	63	80	100
Action	Double acting/Single rod							
Fluid	Hydraulic fluid							
Nominal pressure	10 MPa							
Proof pressure	15 MPa							
Maximum allowable pressure	13 MPa							
Minimum operating pressure	0.3 MPa							
Ambient and fluid temperature	Without auto switch: -10° to 80°C							
	With auto switch: -10° to 60°C							
Piston speed	8 to 100 mm/s							
Cushion	None							
Rod end thread	Female thread, Male thread							
Stroke length tolerance	+0.8 0 mm							
Mounting type	Basic type (through hole), Foot type							

Note) Refer to page 214 for definitions of terms related to pressure.

Manufacture of Intermediate Stroke Cylinders [XC63] (Built-in spacer type)

Intermediate strokes in 5 mm increments can be manufactured by installing spacers inside standard stroke cylinders. (Except ø20, ø25) 55, 60, 65 and 70 mm stroke cylinders have the same overall length as a 75 mm stroke cylinder, and 80, 85, 90 and 95 mm stroke cylinders have the same length as a 100 mm stroke cylinder.

Refer to the Made to Order Specifications on page 277 for the ordering procedure.

Hydraulic Fluid Compatibility

Hydraulic fluid	Compatibility
Standard mineral hydraulic fluid	Compatible
W/O hydraulic fluid	Compatible
O/W hydraulic fluid	Compatible
Water/Glycol hydraulic fluid	*
Phosphate hydraulic fluid	Not compatible

* Consult with SMC.

Water Resistant Type

A special scraper is installed on the basic cylinder to prevent liquid in the surrounding area from entering the cylinder. It can be used in environments where exposure to machine tool coolants is likely, as well as in environments where water spray and splashing is frequent, such as in food processing machinery and car washing equipment.

Some of the parts are different from the dimensions of the basic type. Refer to Best Pneumatics No. 2-1 for details.

⚠ Specific Product Precautions

Be sure to read this before handling the products.

Refer to back page 50 for Safety Instructions and pages 214 to 221 for Hydraulic Cylinder and Auto Switch Precautions.

Usage

⚠ Caution

- Use hexagon socket head cap screws (JISB1176, **strength class 10.9 or higher**) for cylinder mounting.
- Since a lateral load (eccentric load) cannot be applied to the piston rod, build the mounting attachment in such a way that a lateral load will not be applied to the piston rod.
- Make sure that the interlocking length of the rod end thread (male or female thread) and the mounting material is at least 80% of the thread diameter.
- When operating a cylinder for the first time, be sure to release the air inside the cylinder and the piping. When the air release is complete, operate the cylinder at reduced pressure, then gradually increase it to the normal operating pressure.
- Since CH□KDB series does not have an air release plug, release air from other components (e.g. from piping, etc.) as well.
- Do not use two cylinders facing one another horizontally or vertically in such a way that their piston rods strike each other.
- When the cylinder head side contains hydraulic fluid or is in a normally pressurized condition, the applied load must not be allowed to strike the piston rod end. Avoid such applications.
- When mounting the cylinder body with mounting bolts, use tightening torques in the table at left as a guide.

Body mounting bolt tightening torques

Bore size (mm)	Mounting bolt size	Tightening torque (N·m)
20	M5	2.5
25	M5	4
32	M6	7
40	M8	16
50	M10	30
63	M12	40
80	M14	70
100	M16	100

Consult with SMC when using a cylinder in close proximity to a magnetic body (including proximity on any side) as shown in the figure below, as the operation of auto switches may become unstable.

Note) D-A9□/A9□V models cannot be mounted on ø50

* Since this is a guideline including hysteresis, not meant to be guaranteed. (Assuming approximately ±30% dispersion.) There may be the case it will vary substantially depending on an ambient environment.

For ø32 to ø100, besides the models listed in "How to Order," the following auto switches are applicable.

Refer to pages 431 to 490 for detailed auto switch specifications.

Auto switch type	Part no.	Electrical entry	Features
Solid state	D-Y69A, Y69B, Y7PV	Grommet (perpendicular)	—
	D-Y7NWV, Y7PWV, Y7BWV		Diagnostic indication (2-color indicator)
	D-Y59A, Y59B, Y7P	Grommet (in-line)	—
	D-Y7NW, Y7PW, Y7BW		Diagnostic indication (2-color indicator)
	D-Y7BA		Water resistant (2-color indicator)
Reed	D-Z73, Z76	Grommet (in-line)	—
	D-Z80		Without indicator light

* Solid state auto switches are also available with pre-wired connector. Refer to pages 474 and 475 for details.

* Normally closed (N.C. = b contact), solid state auto switches (D-F9G, F9H, Y7G, Y7H) are also available. For details, refer to pages 443 and 445.

How to Mount and Move the Auto Switch

<Applicable auto switch>

Solid state D-M9N(V), D-M9P(V), D-M9B(V),
D-M9NW(V), D-M9PW(V), D-M9BW(V)
D-M9NA(V), D-M9PA(V), D-M9BA(V)

Reed D-A90(V), D-A93(V), D-A96(V)

1. Insert the auto switch mounting bracket into the auto switch mounting groove to set it roughly to the auto switch mounting position.
2. Insert the auto switch into the attachment part of the auto switch mounting bracket.
3. After confirming the detecting position, secure the auto switch by tightening the set screw (M2.5) attached to the auto switch.
4. When changing the detecting position, carry out in the state of 2.

Note) When tightening the auto switch mounting screw, use a watchmaker's screw driver with a grip diameter of 5 to 6 mm. Also, tighten with a torque of 0.1 to 0.15 N·m.

<Applicable auto switch>

Solid state D-Y59[Ⓐ], D-Y69[Ⓐ], D-Y7P(V)
D-Y7NW(V), D-Y7PW(V), D-Y7BW(V)
D-Y7BA

Reed D-Z73, D-Z76, D-Z80

Note) When tightening the auto switch mounting screw, use a watchmaker's screw driver with a grip diameter of 5 to 6 mm. Also, tighten with a torque of 0.05 to 0.1 N·m. As a rule, the mounting screw should be turned about 90° past the point at which tightening can first be felt.

1. Insert the auto switch into the mounting groove and set it at the auto switch mounting position.
2. After reconfirming the detecting position, tighten the mounting screw to secure the auto switch.
3. Modification of the detecting position should be made in the condition of 1.

○: Standard stroke (dedicated cylinder tube)
□: Intermediate stroke XC63 (built-in spacer type)

Manufacture of Intermediate Stroke Cylinders [XC63] (Built-in spacer type)

Intermediate strokes in 5 mm increments can be manufactured by installing spacers inside standard stroke cylinders. (Except ø20, ø25) 55, 60, 65 and 70 mm stroke cylinders have the same overall length as a 75 mm stroke cylinder, and 80, 85, 90 and 95 mm stroke cylinders have the same length as a 100 mm stroke cylinder, 105, 110, 115 and 120 mm stroke cylinders, have the same overall length as a 125 mm stroke cylinder, 130, 135, 140 and 145 mm stroke cylinders have the same overall length as a 150 mm stroke cylinder, 155, 160, 165 and 170 mm stroke cylinders have the same overall length as a 175 mm stroke cylinder.

Refer to the Made to Order Specifications on page 292 for the ordering procedure.

Hydraulic Fluid Compatibility

Hydraulic fluid	Compatibility
Standard mineral hydraulic fluid	Compatible
W/O hydraulic fluid	Compatible
O/W hydraulic fluid	Compatible
Water/Glycol hydraulic fluid	*
Phosphate hydraulic fluid	Not compatible

* Consult with SMC.

CH□KG Series

Mounting Bolts for CH□KGB The mounting bolts shown below conform to JIS B 1176, strength class 10.9 or higher.

Through hole type mounting bolts are available.
Refer to the following for ordering procedures.
Order the actual number of bolts that will be used.

Example) CQ-M5x55L 4 pcs.

! Specific Product Precautions

Be sure to read this before handling the products.

Refer to back page 50 for Safety Instructions and pages 214 to 221 for Hydraulic Cylinder and Auto Switch Precautions.

Usage

! Caution

1. Use hexagon socket head cap screws (JISB1176, strength class 10.9 or higher) for cylinder mounting.
2. Since a lateral load (eccentric load) cannot be applied to the piston rod, build the mounting attachment in such a way that a lateral load will not be applied to the piston rod.
3. Make sure that the interlocking length of the rod end thread (male or female thread) and the mounting material is at least 80% of the thread diameter.
4. When operating a cylinder for the first time, be sure to release the air inside the cylinder and the piping. When the air release is complete, operate the cylinder at reduced pressure, then gradually increase it to the normal operating pressure.
5. Since CH□KGB series does not have an air release plug, release air from other components (e.g. from piping, etc.) as well.
6. Do not use two cylinders facing one another horizontally or vertically in such a way that their piston rods strike each other.
7. When the cylinder head side contains hydraulic fluid or is in a normally pressurized condition, the applied load must not be allowed to strike the piston rod end. Avoid such applications.
8. When mounting the cylinder body with mounting bolts, use tightening torques in the table at left as a guide.

Body mounting bolt tightening torques

Bore size (mm)	Mounting bolt size	Tightening torque (N·m)
20	M5	3.0
25	M5	4.9
32	M6	10
40	M8	20
50	M10	40
63	M12	50
80	M14	80
100	M16	120

Consult with SMC when using a cylinder in close proximity to a magnetic body (including proximity on any side) as shown in the figure below, as the operation of auto switches may become unstable.

Replacement Parts/Seal kit

Bore size (mm)	Seal kit no.	Content
20	CHKG20-PS	Nos. 7, 11, 12, 13 and 14 from the chart at left
25	CHKG25-PS	
32	CHKG32-PS	
40	CHKG40-PS	
50	CHKG50-PS	
63	CHKG63-PS	
80	CHKG80-PS	
100	CHKG100-PS	

* Seal kit consists of items 7, 11, 12, 13 and 14 and can be ordered by using the seal kit number for each bore size.

* Special tools are necessary for disassembly. Contact SMC for recommended tool designs and dimensions. Furthermore, ø80 and ø100 are tightened with a large tightening torque, so disassembly will be difficult. Contact SMC if disassembly is required.

* Since this is a guideline including hysteresis, not meant to be guaranteed. (Assuming approximately ±30% dispersion.)
There may be the case it will vary substantially depending on an ambient environment.

For ø32 to ø100, besides the models listed in "How to Order," the following auto switches are applicable. Refer to pages 431 to 490 for detailed auto switch specifications.

Auto switch type	Part no.	Electrical entry	Features
Solid state	D-Y69A, Y69B, Y7PV	Grommet (Perpendicular)	—
	D-Y7NWV, Y7PWV, Y7BWV		Diagnostic indication (2-color indicator)
	D-Y59A, Y59B, Y7P	Grommet (In-line)	—
	D-Y7NW, Y7PW, Y7BW		Diagnostic indication (2-color indicator)
Reed	D-Y7BA	Grommet (In-line)	Water resistant (2-color indicator)
	D-Z73, Z76		—
	D-Z80		Without indicator light

* Solid state auto switches are also available with pre-wired connector. Refer to pages 474 and 475 for details.

* Normally closed (N.C. = b contact), solid state auto switches (D-F9G, F9H, Y7G, Y7H) are also available. For details, refer to pages 443 and 445.

How to Mount and Move the Auto Switch

<Applicable auto switch>

Solid state D-M9N(V), D-M9P(V), D-M9B(V)
 D-M9NW(V), D-M9PW(V), D-M9BW(V)
 D-M9NA(V), D-M9PA(V), D-M9BA(V)

Reed D-A90(V), D-A93(V), D-A96(V)

1. Set BMG2-012 into the auto switch mounting bracket (BHK2-032).
2. Set the auto switch into the auto switch mounting part of BMG2-012, then insert it into the cylinder's auto switch installing groove.
3. In the above state, set the approximate auto switch mounting sections, then, using a hexagonal wrench, tighten the mounting screw (M3 x 6L) that is an accessory to BHK-032.
4. After confirming the detecting position, tighten the mounting screw (M2.5) for the auto switch to keep it in place.

When tightening the auto switch mounting screw, use a watchmaker's screw driver with a grip diameter of 5 to 6 mm. When tightening the mounting bracket screw included with BHK-032, use a 1.5 mm hexagon wrench.

Also, tighten with a torque of 0.1 to 0.15 N·m.

<Applicable auto switch>

Solid state D-Y59^A, D-Y69^A, D-Y7P(V)
 D-Y7NW(V), D-Y7PW(V), D-Y7BW(V)
 D-Y7BA

Reed D-Z73, D-Z76, D-Z80

When tightening the auto switch mounting screw, use a watchmaker's screw driver with a grip diameter of 5 to 6 mm. When tightening the mounting bracket screw, use a 1.5 mm hexagon wrench. Also, tighten with a torque of 0.1 to 0.15 N·m. As a rule, the mounting screw should be turned about 90° past the point at which tightening can first be felt.
